## ITCHGARD

\*Available in the UK

NEW

### KEY FEATURES

Aid prevention of rubbing from insect bites

Made from plant extracts

Soothing lotion

Reduce damage caused by rubbing

### What is Itchgard used for?

Itchgard is a soothing lotion used to calm and cool irritated skin on horses troubled by itching. It helps to reduce damage caused by rubbing to the Mane and Tail areas by conditioning and protecting hair whilst maintaining skin integrity.

### Is it safe to use when competing / racing under rules?

Yes, this product is safe to use when competing.

### Is Itchgard similar to Kilitch\*?

No, they are two different products from the Carr & Day & Martin Health category.

Killitch\* is a Veterinary licenced product for the prevention and treatment of Sweet Itch. ItchGard may help to lesson some of the symptoms, but it will not prevent or treat the condition. If your pony has been given the diagnosis of suffering from the condition Sweet Itch we would recommend Killitch\*.

### What are the Ingredients in Itchgard?

Key Ingredients are derived from plant extracts including - Lemongrass, Marigold, Geranium and Menthol Oils.

### How often do I need to use ItchGard?

Use for at least three weeks starting daily; and reduce the frequency to once per week if still required. Massaging thoroughly into the affected area.

### How can I achieve the best results?

For best results when trying to prevent your horse from itching we recommend washing their coat with [Gallop Medicated Shampoo](#) to remove scabs and dandruff.

### What fly spray is suitable for sensitive skin?

[Citromax](#) is a gentle yet effective formula that repels midges and all flying and biting insects. Produced from Eucalyptus Citriodora Oil.
